Innoroot Accounting & Technologies .

Graphic designer

- Develop visually compelling designs for client presentations, marketing materials, and digital campaigns.
- Collaborate with clients each quarter to refine design strategies and ensure alignment with their brand vision.

PROJECTS

• Book Shop Management System

Developed a bookshop management system using C++.

The system manages inventory, tracks sales, and automates book ordering processes, improving efficiency and organization in the bookstore.

• Cosmetic Shop Management System

Developed a comprehensive Cosmetic Shop Management System using Java and Object-Oriented Programming principles, implementing role-based access for managers and cashiers. The system features user authentication, product management, stock tracking, and user management. Managers can add, update, and delete products, as well as manage user roles, while both managers and cashiers can view and update stock levels. The project also includes search functionality for easy product lookup, streamlining shop operations and improving

• Pharmacy Website Development

HealthPlus Pharmacy offers online pharmacy services, consultation booking, medication management, immunization, health screenings, compounding services, and a user-friendly design.
